

Nesrallah Shikur

CIT graduate with a marketing minor — building at the intersection of software, data, and direct-response marketing

Contact Information

Mankato, MN
Phone: +1 507-382-4200
Email: nesbashik@gmail.com
LinkedIn: Nesrallah-Shikur
GitHub: Nesrallah-Shikur

Education

Bachelor of Science: Computer Information Technology, GPA: 3.728

Minor: Marketing

Minnesota State University, Mankato, Graduation Date: May 6, 2026

Organizations

ColorStack, NSBE, LeetCode Club, NSLS, CodePath

Skills

Marketing: Meta Ads (Pixel, Conversions API, campaign setup), Shopify, direct-response copywriting (RMBC), customer research & avatar development, funnel analytics (CPM/CTR/CVR/AOV), conversion rate optimization

Marketing Courses: Consumer Behavior, Marketing Research, Digital Marketing, Principles of Marketing

Technical Courses: Data Structure, Algorithm, System Analysis, Information Security

Languages: Python, Java, C, SQL, JavaScript, C++, HTML

Tools: Git, Lucidchart, VMware, VS Code, PyCharm, MySQL, RStudio

Operating Systems: Windows, macOS, Linux, Ubuntu

Experience

Founder, Alemberee™ – Direct-to-Consumer Ecommerce Brand

(2025–Present)

Interactive project map: nesrallah.github.io/alemberee-map

- Launched a live Shopify store end-to-end: product sourcing, international supplier management, product page design, and tiered bundle pricing strategy with free-shipping thresholds (Atlas).
- Implemented Meta ads tracking infrastructure: configured Pixel and Conversions API with Purchase, Add to Cart, and Initiate Checkout events for full-funnel attribution on cold-traffic campaigns.
- Conducted direct-response market research (review mining, competitor ad analysis, customer avatar development) using the RMBC framework to drive data-backed copy and creative decisions.
- Rewrote product page copy and social proof elements to maximize credibility and conversion trust; built a full-funnel measurement framework mapping each metric (CPM, CTR, ATC, checkout completion) to a specific diagnostic and action — instrumented before ad spend.

AWS Cloud Practitioner Training

- Core AWS services: EC2, ELB, Auto Scaling; global infrastructure & pricing models.
- Storage/DB: S3, EBS, EFS, DynamoDB; monitoring with CloudWatch; cost management.
- Security best practices for reliable, cost-effective cloud operations.

Cisco Certified Network Associate (CCNA) Training (Current)

- Practical config/diagnostics on Cisco switches/routers; IP addressing & subnetting.
- VLANs and routing protocols (e.g., OSPF, EIGRP); network security principles.
- Hands-on labs reinforcing switching/routing fundamentals.

HTML Certification Course (2019)

- Mastered HTML5, accessibility, mobile-first structure; built responsive prototypes.
- Created multi-page sites with forms, media, and clear navigation.

Projects

Hospital Management System – Backend Database Design

- Designed SQL schema for patients, appointments, prescriptions; enforced key constraints.
- Implemented scheduling & treatment tracking; added reporting for operational insights.

Healthcare App Developer, Medicine Finder App (Python/Tkinter)

- Queried pharmacy APIs; surfaced availability, store hours, costs; Google Maps integration.
- Built a clean Tkinter UI for quick drug lookup & location guidance.

Web Development & E-Commerce Projects

- **Responsive Portfolio Website** — Part of CodePath's Web Development course (completed Aug 2025): HTML5, CSS3, JavaScript, **Flexbox**; semantic HTML & accessibility for mobile-friendly UX.
- **E-Commerce Website** — Product catalog, cart flow, and responsive layouts; applied marketing minor to analyze **customer demographics** and **color psychology**.
- Ran **behavioral UX research** on dopamine triggers, visual hierarchy, and micro-interactions to guide icon placement, imagery, and calls-to-action.
- Used **Flexbox** for adaptive grids/navigation; improved task success and conversion readiness.
- Mapped the **customer journey** to align page flow with decision stages for a smoother path-to-purchase.

Accomplishments

- Honor Student, Dean's List; National Society of Leadership and Success (NSLS).
- Founded and launched Alemberee™, a live direct-to-consumer ecommerce brand.
- HTML Certification: Accessible, standards-compliant web builds.
- Completed CodePath Cyber Security (hands-on labs).
- Six-month Computer Maintenance & Networking training (Satcom Institute of Technology, 2021).
- Led a course project delivering a fully operational e-commerce site.
- *CodePath Web Development (completed Aug 2025) — will appear in Certifications.*
